FUEL SURCHARGE CLARIFICATION

The September 7 notice sent earlier today, announcing an increase in the fuel surcharge to 5% effective September 15, was correct; however, reference to the current surcharge level of 4% was incorrect. The current surcharge is 3% and it became effective on August 15, 2000.

The earlier notice should have said that the fuel surcharge is being increased from 3% to 5%.

Sorry about the goof, confusion was not our intent.
