 Cleaning Equipment, Janitorial, and Supplies; Cleaning Chemicals; and Sorbents

**NEW ENVIRONMENTALLY-FRIENDLY AND OPERATOR-SAFE
 WAREWASHING CHEMICAL SYSTEM FROM ECOLAB GEOSYSTEM**

Ecolab has developed new technology in dishwashing chemicals, the GeoSystem 9000 warewashing program. In today's environment, the focus is on keeping the kitchen area clean and sanitary, as well as utilizing cleaning chemicals that are safe to use and safe for the environment. This unique chemical cleaning and sanitizing system utilizes a concentrated, non-caustic dish machine detergent, rinse, presoak, and pot/pan detergent that completes the entire chemical requirements for a clean, sanitary, safe, and environmentally-friendly kitchen.

Because of the unique and patent-protected GeoSystem process technology, a detergent wrapper occupies only 5 cubic centimeters when lying flat and consists of less than 6 grams of plastic. Compare these figures to standard plastic capsules (typically containing solid or powder-form detergents) which typically occupy more than 3,700 cubic centimeters (per capsule) and consist of more than 175 grams of plastic.

GeoSystem 9000 is enhanced for user safety – no risk of chemical burns, is shape-coded and color-coded for language-free use. This prevents operational mishaps.

AUTOMOTIVE TESTERS

Now you can purchase a new OBD II Technology scan tool for your fleet vehicles through GSA. Actron's Model KM9615 "Generic" OBD II Scan Tool is a must for inspection and maintenance pre-tests in the area of inspection testing! The KM9615 is the most economical scan tool for performing OBD II system diagnosis on all OB II vehicles that meet EPA standards. This includes domestic, Asian, European, and light-duty trucks. Hardware supports the DLC2, HBCC, and ISO communications hardware. One of the best and lowest cost OBD II units on the market today. Features include:

- LCD display is 4 X 20 characters
- User Help "Key" for on-line instructions
- Code lookup, fast code definitions
- Easy to use 6-button keypad
- Conforms to SAE J1978 spec
- State Certified for Inspection & Maintenance Pre-Test

You can order this item on-line through GSA Advantage! linked at www.gsaAdvantage.GOV, or by directly contacting the contractor:

**New Award Under Federal Supply Schedule 66 II C
General Purpose Laboratory Equipment and Services**

**MICROBIOLOGY INTERNATIONAL ANAEROBIC AND
MICROAEROBIC WORKSTATIONS**

Microbiology International specializes in the complete automation of the modern microbiology laboratory. These workstations provide strict anaerobic or user programmed microaerobic environments. The humidity control is set by the user; excess humidity is never a concern with the automated de-humidifier system. In addition, use of the patented Anotox in the workstation means that users no longer need to change the palladium catalyst regularly allowing the workstation to be virtually maintenance free.

 Recycling Collection Containers and Specialty Waste Receptacles

FIRE-STOP WASTE RECEPTACLES

Hodge Manufacturing Company, Inc., proudly introduces its Fire-Stop steel swing top waste receptacles. The fire-extinguishing features include a patented Baffle System, which cuts off the oxygen supply. The Fire-Stop units are listed and approved by the California State Fire Marshall and also meet OSHA requirements. Units come with a vinyl bumper around the top and a double reinforced bottom so that the unit will not tip over beyond 20 degrees. The baked enamel finish is available in white, cinnamon, or beige. Other colors are also available upon request. The Fire-Stop receptacle is available in 10, 21, or 36-gallon capacities. Customization is available. The Fire-Stop receptacle is ideal for institutions, sports arenas, public facilities, or any facility that is unattended after hours.

The MainStreet® receptacle is the newest addition to the Hodge Manufacturing Company product line. This receptacle offers the beauty of an era gone by, plus the durability, cost-efficiency, and functionality required for today's environment. These receptacles come with and without push flaps. The durability of the powder-coated steel frames provides environmental ruggedness. These units offer the cost efficiency of plastic panels and tops and are shipped completely assembled. The functionality of interchangeable panels and tops allows for easy replacement whenever a new look is desired or if a panel is damaged. The MainStreet® Line comes in a variety of sizes and colors. A rigid line is also available for this receptacle.

Toiletries**

**NEW CLEAN IN A MINUTE® ALL NATURAL
FACIAL CLEANING MITTEN**

Clean in a Minute® is a 100% polyester cloth shaped in the form of a mitten that fits onto your hand. When dampened with regular tap water, the mitten has the remarkable ability to remove all your makeup, facial camouflage, or grease paint, and deep clean your skin too, in just a few sec-

onds! There are absolutely no added chemicals or cleansers inside the mitten, it is all-natural! When you are done removing your facial coverings and deep cleaning your skin, you just wash the Clean in a Minute® with a bar of toiletry soap and water and hang to dry. It is reusable for several months, even up to a year with average daily use. The remarkable cleaning ability found in the Clean in a Minute® product is due to its high tech micro-fiber structure and weave providing the ability to clean so well without chemicals or cleansers.

Federal Supply Schedule 61 V - Power Distribution Equipment, Generators and Batteries

PROCELL BATTERIES!

What are the advantages of Procell alkaline batteries versus super heavy duty batteries? Procell alkaline batteries provide superior end-user value and savings on overall battery cost and have both a higher energy density and a greater power capability. The batteries provide up to five times the service life in high drain and/or high voltage devices, operate longer and have a greater capacity retention when stored in temperature extremes, are less likely to leak - protecting important equipment, and have a five times longer shelf life.

Procell alkaline batteries provide the same performance and quality as other name brand batteries and deliver the same performance and reliability. Major advantages are:

- Long lasting and dependable – even after five years of storage.
- Last up to five times longer than super heavy duty batteries.
- Long service life at high drain discharges.
- Operate reliably in temperature extremes of – 20 to 54 degrees.

- Date coded to ensure freshness.
- Economical bulk packaging for professional applications.
- Contains no added mercury.

Now Available on Federal Supply Schedule 80 III A, Special Items 834 400 & 834 500
Paint, Sealers, Adhesives, Removers and Other Coatings

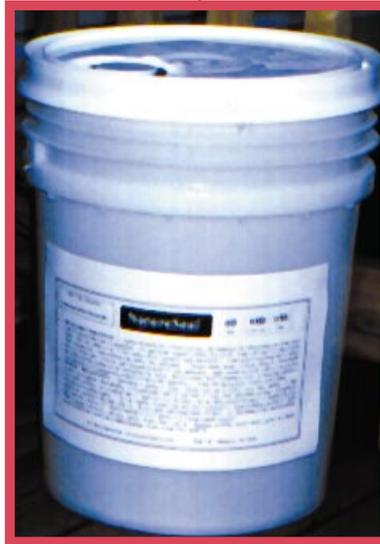

**NATURESEAL - ENVIRONMENTAL WATERPROOFER
FOR EXTERIOR CONCRETE, MASONRY, BRICK, STONE, STUCCO & WOOD**

Problem: Rain, snow, salt and UV cause widespread damage in unprotected building material surfaces like concrete, masonry, brick, stone, stucco, adobe and wood. The damage is evident as freeze-thaw, efflorescence, cracks, mildew growth, chalking, etc. Solution: Environmentally friendly, water-based, low VOC NatureSeal formulations penetrate deep inside porous surfaces to form a lasting bond. When NatureSeal treated surfaces are exposed to rain and snow, a combination of water sheeting & beading occurs. NatureSeal exhibits excellent abrasion resistance and adhesion properties. Datasheet, MSDS and Price list available. Uses: NatureSeal 60 is used for protecting concrete driveways, parking areas, walkways, floors, walls, pool decks, patios, and masonry blocks. NatureSeal 100 is used for protecting wood decks, fences, beams, sidings and joists.

You may order through **GSA Advantage!** at www.gsaAdvantage.GOV, or you may order directly from the Contractor using the GSA SmartPay purchase card.

Instruments and Laboratory Equipment & Services**

TEST AND MEASUREMENT EQUIPMENT AND SERVICES

The Office and Scientific Equipment Center has made a new contract award under Federal Supply Schedule 66 II J, Test and Measurement Equipment, to American GNC Corporation.

Two Special Item Number (SIN) categories are included under this new contract: SIN 602-22, Acceleration Transducers, and SIN 627-38, Global Positioning System (GPS) Receiver Test Sets.

The AGNC-2000 CMIMU (Core Micro IMU) is one of the world's smallest "Micro IMU's" (Inertial Measurement Units) with solid-state micro-electromechanical sensors. It provides angle increments, velocity increments, a time base (sync) in three axes and is capable of withstanding high vibration and accelerations. Applications include land navigation, automobiles, personal navigators, robotics, marine vehicles and unmanned aerial vehicles.

The AGNC-2000 GIE is a real-time GPS/IMU Emulator. It is an emulation computer system capable of

simulating GPS receivers and/or IMU's. It can be used for the ground test of GPS/IMU navigation software. The system receives real-time flight trajectory data from a 6DOF flight trajectory generator and sends out GPS measurements for all in-view satellites as well as position and velocity messages and IMU measurements.

Order directly from the contractor:

CHART RECORDERS

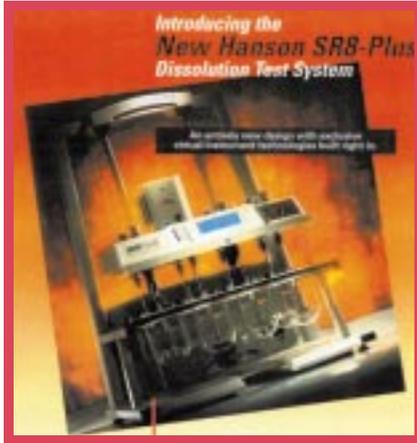

Our Test and Measurement Equipment Federal Supply Schedule, 66 II J, features Chart Recorders under Special Item Number 602-12. Chart Recorders are instruments used for trace recording of various signal sources. This category includes pen, thermal and optical-based recorders and event, transient, and oscillographic type recorders. It also includes plug-in configurable chart recorders and their design-mated signal conditioning modules and non-generic sensors (sensors which have been specifically designed and mated to a logger so long as the logger has adaptability to multiple parameters).

To get a list of the contractors to whom we have made awards under this Schedule, go to the FSS webpage at www.fss.gsa.gov, click on "Information for Customers", then click on "Schedules E-Library" and key in the Special Item Number "602-12". You will find the contractors' names, addresses, phone numbers and contract numbers. Call the contractors directly to learn more about the chart recorders that they have on the GSA Federal Supply Schedule.

New Award Under Federal Supply Schedule 66 II Q

**G E O P H Y S I C A L , E N V I R O N M E N T A L A N A L Y S I S E Q U I P M E N T
A N D S E R V I C E S**

Hanson's Dissolution Test System, model SR8-Plus, is a new design with virtual instrument technologies built right in. The virtual instrumentation creates a new interactive software user playground, which results in a "smart" instrument that anticipates and reacts to changing workload requirements. It has a pop-up menu and "help" screens along with icon-based program controls; templates to create, edit, save and validate dissolution protocols; soft chime and status light reminders for sampling and pH change; SR "Sustained Release" precision drive system; programmable morning "wake-up" pre-heat; and programs for language choice, calibration, diagnostics and more.

Hanson's Media-Mate Plus provides automatic media pre-heat, filtration, USP/FDA recommended deaeration (below 95% saturation level), and precise volumetric dispensing into six or seven flasks in about 3 minutes. The Media-Mate Plus offers portability for servicing of many

dissolution test stations. Also equipped with the Hanson "virtual instrument" design, the system is expandable with interchangeable pre-heat tanks.

Hanson was awarded SIN 66-618. For further information, contact:

Hanson Research Corporation
(818) 888-7266

Chemistry, Biochemistry and Clinical Instruments and Services**

LABSPEC® PRO

Analytical Spectral Devices' model LabSpec Pro is a portable near infrared spectrophotometer. This analyzer offers ruggedness, durability and reliability in a laboratory instrument. Equipped with a built-in handle and internal batteries, LabSpec Pro offers the flexibility to get out of the lab, collect samples, make demonstrations, prove concepts or troubleshoot problems. Its case, made of the same material as industrial power tools, and chemically resistant aluminum front panel makes LabSpec Pro appropriate for use in virtually any environment. It has

laboratory accuracy to meet your QA/QC measurement needs. With a wave-length range of 350nm – 2500nm that can penetrate many plastic bags, bottles or glass vials, LabSpec Pro offers the convenience of testing samples in their original containers. With a scanning time of 0.1 seconds and a sampling interval of 2nm, LabSpec Pro is well suited for nondestructive quality control applications.

Analytical Spectral Devices, Inc. was awarded SIN 632-6. They were also awarded product support options SINs 615-5001, 615-5002, 615-5003, 615-5004, and 615-5005.

**DESKTOP IMAGING PRODUCTS 335XGA &
235 SVGA ULTRA-PORTABLE LCD PROJECTORS**

Yes, you can order two great projectors! These projectors are for presenters on the go! The Polaview 335 and 235 feature lumen brightness, resolution and great portability.

Their ideal use is for computer or video presentations, demanding applications such as larger presentation rooms, projection of fine detail and a connection to a digital camera for direct output of your images. It's an ideal match to the image appearing on your computer screen.

Model weight: Less than 10 pounds, making them easy to carry and simple to store. Their silent operation makes them unobtrusive in practically any setting.

With 335/235's direct connect capability you can use your projector to preview your digital camera pictures. They are compatible with major digital camera brands

including Canon, Kodak, Olympus and Nikon. Moreover, you can get input from a DVD player or even from an HDTV source. A PC card adapter is built in and a Wireless Remote with Laser Pointer is included.

These two projectors feature superior performance and value to meet your needs, all at an affordable price.
