## Federal Supply Solutions and More (SAM) Schedule 539 Prefabricated Structures and Outdoor Smoking Shelters

### PREFABRICATED STRUCTURES AND OUTDOOR SMOKING SHELTERS

American Steel Span Buildings provides high quality, affordable, clear span buildings. These extremely versatile arch-style buildings are used throughout the world in practically every application.

Three different styles are available:

- S-Series
- P-Series
- Q-Series

These styles range in sizes from 16' wide up to 70' wide and have unlimited lengths of two feet increments.

A 25-year warranty comes with each building.

Send orders directly to the contractor:

**Federal Supply Solutions and More (SAM)  
Schedule 539  
Law Enforcement and Security Equipment**

**SECURITY PAD**

Never again use a dome light or flashlight to check your dispatched location or cellular phone message. Use the Security Pad, the internal red-lighted message pad that also protects your night vision. This "message mate" is available with a velcro strap. Ideal for pilots or military police who ride bicycles, because it can be strapped around the leg.

The units are water-resistant. The writing pencil is a translucent wax used on the Plexiglas' surface. It is a must for taking vehicle identification numbers during the day or night. Your message may be transferred to your paperwork once inside your vehicle or office.

The "message mate" has a red Plexiglas writing surface giving the user a complete red message or diagram. It is an ideal unit for drug enforcement or security situations.

By using a white china marker on this unit, it becomes highly visible in the daytime, yet at night the same message is red. It can be attached to the window by the two suction cups on the top of the unit or it can be portable. The Security Pad uses one AAA battery, which operates for hours, by using the built-in on and off switch.

Order on-line through *GSA Advantage!* at [www.gsaAdvantage.GOV](http://www.gsaAdvantage.GOV) or directly from the contractor:

## Federal Supply Solutions and More (SAM) Schedule 539 Boundary Signs and Markers

### YODOCK BARRIER SYSTEM

The Yodock Barrier System is a patented, heavy-duty plastic channeling device. It resembles the standard concrete "Jersey" curb barrier. Unlike concrete barriers, the Yodock Barrier is a plastic container that is easy to transport when empty. When filled with water, sand or other materials, it provides positive protection for the most demanding needs. The system can replace many existing products such as barricades, barrels and old barriers. Yodock barriers can be used singly, as stand alones, or connected together to form a continuous wall.

The versatility of the Yodock Barrier System enables it to be a key component of construction area protection, soil erosion, security, explosion protection and much more. Because the system increases the decision sight distance of the motorist or pedestrian, a safer and more productive work area is achieved. In addition, the Yodock Barrier System supplies a full line of other safety products that include plastic barricades, cones, barricade lights, caution tape and parking stops.

Order on-line through *GSA Advantage!* at [www.gsaAdvantage.GOV](http://www.gsaAdvantage.GOV) or directly from the contractor:

### STATE INDUSTRIAL PRODUCTS

With a strong track record of servicing government customers, State's service-oriented approach supports a broad product offering. These products include: air freshener, deodorizers, hand cleaners, drain care, hard-surface and heavy duty cleaners, industrial degreasers, lubricants, specialty products, water treatment and ground care.

States' extensive product line of specialty designed products and equipment serves the needs of a wide variety of markets. Customers range from office buildings to manufacturers; from hospitals to utilities; and from schools to universities. To ensure fast delivery, strategically located warehouses are located throughout North America and Europe with over 90% of all orders shipping within 24 hours.
